Southern California Association of Governments

The Southern California Association of Governments (SCAG), founded in 1965, is a Joint Powers Authority under California state law, established as an association of local governments and agencies that voluntarily convene as a forum to address regional issues. Under federal law, SCAG is designated as a Metropolitan Planning Organization (MPO) and under state law serves as the Multicounty Designated Transportation Planning Agency for the six (6) county Southern California region. Through SCAG, city and county governments throughout Southern California come together to develop solutions to common problems in transportation, housing, air quality, and other issues.

Under the guidance of the Regional Council and in collaboration with its partners, SCAG's mission is to foster innovative regional solutions that improve the lives of Southern Californians through inclusive collaboration, visionary planning, regional advocacy, information sharing, and promoting best practices.

SCAG's primary responsibilities include the development of the Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS); the Federal Transportation Improvement Program (FTIP); the annual Overall Work Program (OWP); and transportation-related portions of local air quality management plans. Under the federal Clean Air Act, SCAG is responsible for determining if regional transportation plans and programs are in conformity with the purpose of applicable federal regulations and state air quality plans. SCAG's additional functions include intergovernmental review of regionally significant development projects, and periodic preparation of a Regional Housing Needs Assessment (RHNA).

In addition to the six (6) counties and 191 cities that make up SCAG's region, there are six (6) County Transportation Commissions (CTCs) that hold the primary responsibility for programming and implementing transportation projects, programs and services in their respective counties and five (5) local air districts that are responsible for air quality planning and management within their respective jurisdictions. The agency also operates via a number of critical partnerships at the local, state and federal levels. In addition to its federal and state funding and review partners (Federal Highway Administration, Federal Transit Administration, Federal Aviation Administration, California Transportation Commission, California Department of Transportation, California Air Resources Board, etc.), SCAG's

Regional Prospectus

planning efforts are closely coordinated with regional transit operators, Tribal Governments and fifteen sub-regional Councils of Governments (COGs or Subregions) or joint power agencies that represent SCAG's cities and counties.

Introduction

This Overall Work Program (OWP) identifies the work which will be accomplished during the fiscal year of July 1, 2020 through June 30, 2021 (FY 2020-21). It discusses the planning priorities, the needs of the region, and the specific programs to meet those needs. It serves as a management tool for SCAG's main governing body, the Regional Council, as well as its policy committees, working groups and staff. It additionally provides local and state agencies a focal point for improving regional coordination and reducing duplication of work efforts at all levels. The work contained in this OWP complies with federal and state requirements, including requirements under the federal Fixing America's Surface Transportation Act (FAST Act) and Moving Ahead for Progress in the 21st Century (MAP-21) and under the state SB 375, and it reflects a concentrated focus on the implementation of the 2020 RTP/SCS or Connect SoCal which includes efforts related to congestion reduction, financial planning, system preservation and performance measures – areas identified as important by SCAG and the U.S. Department of Transportation (U.S. DOT).

I. Significant Regional Characteristics and Issues

Southern California has experienced some of the worst congestion in the country for the past two decades. The region also suffers from the lack of affordable housing. With the population expected to grow by nearly 4 million people by the year 2045, mobility is expected to decline as demands placed on existing infrastructure increase. In order to provide for the mobility needs of the future while improving the region's sustainability and economy, regional solutions and an unprecedented level of regional cooperation will be essential.

Southern California is also a national gateway for trade, with over 40% of all international containerized goods entering our regional seaports. More than 70% of these goods are destined for other parts of the country. The movement of goods through the Southern California seaports and land ports provides a substantial economic base to the region. Job

Regional Prospectus

growth in this industry could replace lost manufacturing jobs as a source of upward social mobility for the nearly 70% of the region's adults without a college degree.

While substantial growth in trade is anticipated – including a more than doubling of containerized imports through the San Pedro Bay Ports – the region will be unable to reap the associated economic benefits without sufficient investment in freight infrastructure (i.e., rail, highway, intermodal, airport, and marine facilities). Moreover, significant challenges arising from the growth in trade will require appropriate mitigation of already substantial environmental, public health, and community impacts. Addressing these needs will require new, more flexible financial instruments that combine the best features of public and private sector management, as well as new institutional structures to administer them.

Southern California also has among the worst air quality in this country. Without an infusion of sufficient funding, the region may not be able to demonstrate attainment of health-based national ambient air quality standards and public health and economic growth in the region will suffer as a result.

II. Regional Transportation Needs, Planning Priorities and Goals

As part of the annual budget development planning process, SCAG has an obligation to incorporate the federal planning factors identified in MAP-21/FAST Act for the development and implementation of regional transportation planning activities where federal funding is involved. Table 1 on the next page shows the SCAG program areas that accomplish the federal planning factors identified in the legislation.

III. How Needs, Priorities and Goals are Addressed in the Work Elements

A. Goods Movement

SCAG's goods movement program integrates freight transportation strategies and policies into regional transportation planning. SCAG continues to work with diverse transportation stakeholders to build support for a comprehensive program of investment in freight infrastructure and associated emissions reductions as reflected in Connect SoCal.

Recent research initiatives have included:

- Evaluation and analysis of the regional goods movement system (including an assessment of last mile deliveries to better gauge intra-regional movement of freight and challenges associated with last mile deliveries)
- Recommendations for potential application of new technologies and operational strategies
- Assessment of path forward for the advancement of zero emission technologies

In FY 2019-20, SCAG continued efforts to refine and support the implementation of strategies developed through the Comprehensive Regional Goods Movement Plan and Implementation Strategy and reflected updates in the Connect SoCal. SCAG also participated in efforts to develop state and national freight plans and associated freight network designation processes. In FY 2020-21, SCAG will continue to advance efforts that promote the efficient movement of goods through the region and provides effective environmental mitigation.

In FY 2019-20, SCAG completed its Last Mile Delivery Study to develop an understanding of current last-mile freight delivery conditions, highlight best practices, assess the feasibility of various solutions, and provide pragmatic recommendations to address existing and future delivery challenges that can be applied throughout the region. Additionally, SCAG worked closely with partner agencies to complete the Calexico West Port of Entry Traffic Circulation Plan to create and support an implementation strategy to mitigate projected increases in congestion, traffic delays, and other negative consequences linked to the reconfiguration

Regional Prospectus

and expansion of the Calexico West border crossing. SCAG also collaborated closely with regional stakeholders to provide input into state and federal grant processes. Specifically, SCAG coordinated responses to competitive federal and state discretionary grant funding opportunities.

SCAG also continued to support the aims of the Southern California National Freight Gateway Collaboration, a group comprised of key local, regional, state, and federal representatives formed to address infrastructure, environmental, and community quality of life challenges presented by the unprecedented growth in goods movement.

Continuing through FY 2020-21, SCAG will support ongoing analyses of last mile delivery strategies, working in coordination with partner agencies and private sector stakeholders to test pilot initiatives that enable greater efficiencies while reducing emissions.

SCAG will also continue its efforts to complete an integrated passenger and freight rail forecast—assessing physical and operational constraints, use agreements, and planned capacity improvements for regional rail facilities. SCAG will complete work with partner agencies, finalizing grant-funded research and studies focused on diverse goods movement issues, including approaches for integrating clean fuels technology in San Bernardino County, assessment and designation of freight corridors and accompanying mobility strategies in Ventura County, and mitigations for neighborhood truck intrusions in port-adjacent disadvantaged and EJ communities. Finally, SCAG will focus heavily on updating its Comprehensive Regional Goods Movement Plan, conducting data collection/acquisition efforts to further develop SCAG's Heavy Duty Truck (HDT) model. Updates to the HDT model will better reflect broader changes in supply chain strategies and associated impacts to transportation.

B. Congestion Reduction

The existing congestion problems experienced in the region today are only expected to worsen due to projected growth in population and travel demand. Consequently, SCAG has engaged in a number of regional initiatives to identify strategies to manage congestion.

In 2010 and 2011, SCAG partnered with Caltrans to complete Corridor System Management Plans (CSMPs) that rely on a comprehensive performance analysis of congestion data to

Regional Prospectus

identify traffic bottlenecks, and the development of complex micro-simulation models to simulate corridor traffic. Using information from this analysis, the CSMPs identify near-and mid-term operational strategies to improve mobility, reliability, productivity, and safety. In FY 2018-19, SCAG completed the I-105 Corridor Sustainability Study (CSS) a comprehensive multi-modal corridor study that examines the I-105 study area from a broad multi-modal perspective. The I-105 CSS assessed freeway and arterial congestion and also identified additional corridor improvements, such as complete streets concepts, high occupancy vehicle (HOV) lanes, express lanes, and other advanced operational strategies. The I-105 CSS recommends solutions that would improve air quality, system connectivity and efficiency, and reduce emissions, traffic congestion and improve safety. The I-105 CSS will be a resource to develop local resources and build upon previous transportation efforts to create an integrated transportation system within and along the I-105.

A poorly maintained transportation system impedes traffic flow and creates unsafe condition for system users. SCAG's Regional Council recognizes this fact and continues to support greater commitments to system preservation in the Connect SoCal. In order to make progress on this commitment, SCAG initiated an effort in FY 2013-14 to develop a comprehensive database and monitor the condition of our transportation assets in an attempt to better manage these assets over the long haul and recommended needed adjustments to the broader policies related to system preservation in the 2016 RTP/SCS. In FY 2017-18, SCAG made significant progress on this important effort by analyzing the costs associated with transportation system preservation and achieving a state of good repair. The results of this effort have been incorporated in Connect SoCal, thus reaffirming SCAG's commitment to system preservation and resilience from natural as well as man-made causes.

In FY 2008-09, SCAG initiated a multi-year study to evaluate congestion pricing alternatives and their applicability in the SCAG region, conduct extensive public outreach and market analysis, and develop a financial plan and implementation strategy for a pilot initiative. The results of this first phase of the Express Travel Choices study fed directly into the 2012 RTP/SCS. A second phase of the Express Travel Choices study initiated in FY 2012-13 developed an implementation plan, including the build-out of the existing and planned managed network of express lanes across Southern California and integration with one or

Regional Prospectus

more pilot projects for cordon/area pricing within specific major activity centers. A regional concept of operations for express lanes throughout the region was completed in FY 2015-16 and revised in FY 2017-18. As a living document, additional updates will be made in FY 2020-21. A feasibility study and concept of operations for a cordon pricing pilot project, including stakeholder engagement, was completed in FY 2018-19. Ongoing outreach work to explore equity issues related to pricing and zero-emission areas is currently underway. Further work to assess pricing and broader incentive concepts will continue into FY 2020-21.

SCAG continues to work on improving our Congestion Management Process through better coordination and integration of all of our transportation planning and programming activities, as well as updates of our RTP/SCS and FTIP. As part of this improvement, in 2011, SCAG developed new performance criteria to assess the impacts of non-recurring congestion and developed appropriate strategies to address them in the 2016 RTP/SCS. Furthermore, in FY 2016-17, SCAG enhanced its process and documentation of how programmed highway capacity projects are developed and integrated with complementary TDM and TSM strategies. In FY 2018-19-20, SCAG further initiated an effort to develop a completed long-range TDM Strategic Plan to provide an objectives-driven, performance-based planning framework for identifying TDM strategies that increase the efficiency of the transportation system through alternative modes of travel. This work includes updating the CMP a toolbox of TDM strategies included in the RTP/SCS appendix with additional TDM strategies Connect SoCal Congestion Management Technical Report. In FY 20-21, SCAG will implement several recommendations from the TDM Strategic Plan, to deliver a series of TDM training across the six-county region and to initiate development of a regional TDM data clearinghouse. The clearinghouse is intended to promote a standardized data collection method and support high-quality data of both existing conditions surrounding TDM programs as well as data showing the effects of programs that are implemented, leading to a better-informed set of TDM implementers and better programs for residents and commuters.

Intelligent Transportation Systems (ITS) are important elements of SCAG's congestion reduction strategies. Ensuring coordination and consistency of implementation of ITS strategies on a region-wide basis and between jurisdictions is crucial to maximizing the benefits of ITS projects. SCAG continues to facilitate such coordination efforts through its regular and timely updates of the Regional ITS Architecture. In FY 19-20, SCAG completed the

Regional Prospectus

update of the Regional ITS Architecture and, in coordination with FHWA, provided training workshops across the region regarding use of the new Architecture. In FY 20-21, SCAG will coordinate with the Riverside County Transportation Commission and San Bernardino County Transportation Authority regarding the update of the Inland Empire Regional ITS Architecture.

As a subcomponent to ITS, integrated corridor management (ICM) strategies also play a vital role towards reducing congestion. Since 2012, SCAG has been working closely with California PATH, Caltrans, Metro, and local agencies to develop the first Integrated Corridor Management (ICM) pilot project within the SCAG region along the Interstate 210 (I-210) corridor. The purpose of the pilot project is to look at all opportunities to move people and goods in the most efficient manner possible, to ensure the greatest potential gains in operational performance. This includes seeking ways to improve how arterials, highways, transit and parking systems work in conjunction with one another.

C. Sustainability Program (Land Use/Transportation Integration)

SCAG's Sustainability Program is a core effort for implementing Connect SoCal. The program demonstrates that the region can achieve both mobility and air quality goals through local land use and policy changes along with targeted transportation investments. Overall objectives of the Sustainability Program are achieved through a variety of projects:

RTP/SCS Development and Implementation: A priority for the Sustainability Department is to implement policies for the RTP/SCS that will help meet state greenhouse gas emissions reduction targets and advanced land use strategies by advancing best practices and working with local stakeholders to identify implementation opportunities.

Sustainable Communities Program: Continue work on an ongoing Sustainability Planning Grant projects and collaborative resource program with member local governments and communities for coordinating sustainable transportation, land use and regional policies and issues in local planning. Emphasis will be placed on local and regional planning for greenhouse gas reductions.

Regional Resiliency: Analysis of planned regional strategies and investments through the lens of potential resiliency to land based, atmospheric and geologic natural hazards.

Regional Prospectus

Climate Adaptation Framework: Collaborate with local jurisdictions on data and communication tools to translate climate adaptation strategies into action.

Electric Vehicle Program: Develop strategies and increase readiness for rapid deployment of electric vehicles in the region.

High Quality Transit Area (HQTA) Analysis: Identify and analyze issues that relate to integration of regional transportation and community goals and objectives in land use to better determine context-sensitive approaches for supporting growth in HQTAs in a variety of regional settings. HQTAs are generally walkable transit villages or corridors, within one half-mile of a well-serviced transit stop or a transit corridor with 15-minute or less service frequency during peak commute hours.

Greenhouse Gas Reduction Fund (GGRF) Technical Assistance: Help ensure state greenhouse gas reduction fund monies are available to Southern California region jurisdictions and stakeholders and provide the policy framework for competitive applications from stakeholders.

Regional Planning for Open Space: Engage partners and stakeholders on potential resource conservation strategies, and establish approaches to support implementation of regional policies and recommendations for conserving and restoring natural and agricultural lands.

Local Technical Assistance: Facilitation of the Toolbox Tuesdays Training Series to build local capacity in innovative and integrated transportation and planning tools.

SCAG Sustainability Awards: Awards Program for outstanding examples of integrated transportation and land use planning, implementing the RTP/SCS at the local level.

Joint Work Programs: Regional stakeholder coordination for various sustainability issues related to implementation of Connect SoCal.

D. Regional Transit and High Speed Rail Planning

During FY 2020-21, SCAG will continue coordinating with transit operators in its planning efforts, as required by the Federal regulations for metropolitan transportation planning, and pursuant to the Memoranda of Understanding (MOUs) between SCAG and transit operators

Regional Prospectus

in the region that was updated and executed in FY 2017-18; SCAG will accomplish this through ongoing meetings of the Regional Transit Technical Advisory Committee (RTTAC) and direct one-on-one engagement with transit agencies.

Staff will continue to monitor and participate in the Federal Transit Administration's (FTA's) rulemaking process to implement new requirements from the Moving Ahead for Progress in the 21st Century Act (MAP-21) and the Fixing America's Surface Transportation (FAST) Act. Staff will coordinate with the RTTAC and the CTCs to address new rulemaking regarding performance-based planning for transit safety and transit asset management (TAM). On July 2017, SCAG established initial regional TAM targets in compliance with the FTA Final Rule. In FY 2018-19, SCAG initiated the process to establish regional TAM targets for Connect SoCal. SCAG then incorporated TAM targets in Connect SoCal. During FY 2020-21, SCAG will similarly engage with transit operators to develop initial regional transit safety targets.

In FY 2019-20, SCAG in coordination with the RTTAC updated its methodology for identifying high quality transit corridors and major transit stops, consistent with SB 375, SB 743 and CA Public Resources Code. The methodology is documented in the Connect SoCal Transit Technical Report. This analysis formed the basis for identifying Priority Growth Areas for Connect SoCal, linking land use and transportation to support regional goals to improve mobility and sustainability.

During FY 2017-18, SCAG and the University of California, Los Angeles (UCLA) Institute of Transportation Studies released a report entitled "Falling Transit Ridership," which sought to identify the causes of ridership declines in the region. This genesis of this report was the ongoing staff efforts to monitor annual transit system performance based on National Transit Database data, which identified falling per capita transit ridership as a cause for concern. The SCAG/UCLA report identified dramatic increases in vehicle ownership, particularly among population groups most likely to take transit, as the likely primary cause. This finding will helped to guide development of strategies for Connect SoCal to ensure the region will continue to meet all of its mobility, air quality, and sustainability goals. Additionally, in FY 2018-19 Subsequently, SCAG initiated with UCLA a follow-up study to better understand the role that neighborhood change may have played in the ridership declines. This research is expected to conclude in FY 2020-21.

Regional Prospectus

In FY 2020-21, SCAG initiated will continue work on two transit planning studies, one to develop a regional paratransit demand forecast, and another to develop an integrated freight and passenger rail forecast. Both study efforts will support future RTP/SCS updates on critical transit and rail issues affecting the region.

Furthermore, staff will continue to manage and assist with state and federal funding programs, including overseeing the Caltrans 5304 Sustainable Communities Planning Grants. SCAG will also cooperate with our regional partners in a variety of studies and projects throughout the region. Staff expects to assist SCAG's Subregions and CTCs with proposal reviews, system performance studies, and a variety of project planning activities.

With respect to High Speed Rail (HSR), staff will continue to coordinate implementation of the Memorandum of Understanding (MOU) between the California High-Speed Rail Authority, CTCs, Metrolink, San Diego Association of Governments (SANDAG) and SCAG for the programming of \$1 billion in HSR funds to improve the region's existing passenger rail services. In FY 2020-21, SCAG will continue to work with local stakeholders and state agencies to ensure an engaged and participatory planning process for the proposed state HSR system in accordance with the cooperative MOU that is in place. SCAG will also support the advancement of Metrolink's Southern California Optimized Rail Expansion (SCORE) program, a \$10 billion capital improvement program — grade crossing, station and signal improvements as well as track additions and work that accelerates progress towards Metrolink's zero-emissions future.

E. Corridor & Other Planning Studies

SCAG coordinates, directs and participates in a number of corridor studies and other planning studies, many with county transportation commissions, Caltrans, subregional entities, and/or other partners. While each study has its unique objectives, all are designed to develop a comprehensive approach to addressing corridor congestion problems by considering operational improvements in conjunction with critical capacity enhancements and leveraging other modes of travel such as transit, walking, and/or biking. Ultimately, the goal is to better inform regional transportation decision-making. Below is a list of corridor studies that are ongoing and/or new initiatives around the region:

Regional Prospectus

- I-710 Corridor Project (Metro)
- I-605 Corridor Improvement Project (Metro)
- I-210 Connected Corridors Pilot (Metro)
- I-105 Express Lanes Project (Metro)
- I-15 Corridor Project (SBCTA)
- US-101 Multi-Modal Corridor Study (VCTC and SCAG)
- Inland Empire Comprehensive Corridor Plans (SBCTA, RCTC and SCAG)
- North Orange County Triangle Connected Corridors (Caltrans District 12)
- Implementation support for I-105 Corridor Sustainability Study (SCAG)

F. Infrastructure Financing

New funding sources are needed to address the mobility, air quality, and land use needs facing the region. Several promising transportation and land-use strategies will require significant funding levels for the region to adequately address the challenges in these areas. Without an infusion of sufficient funding, the region will not be able to demonstrate the required attainment of health-based national ambient air quality standards or comply with State requirements for greenhouse gas emission reductions.

Despite passage of Senate Bill 1 (Road Repair and Accountability Act of 2017), local streets and roads and bridges are not projected to meet state of repair performance measures without additional funding. In FY 2019-20, resources have continued to be dedicated to identifying more efficient means of generating revenue to support transportation system investments and associated mitigation needs as part of the development of the technical and policy framework for the Connect SoCal financial plan. Efforts have included analyses of financial conditions, identification of new innovative financing opportunities, and investigation of various public-private partnership initiatives. In FY 2020-21, SCAG will continue efforts to move forward on these strategies.

G. Active Transportation

SCAG's Active Transportation Program works to integrate active transportation into the regional transportation planning processes and support local actions to implement the

Regional Prospectus

regional plan. During FY 2019-20, SCAG continued to work with a wide variety of active transportation stakeholders to develop plans, conduct analysis, and access funding to advance policies adopted in the 2016 RTP/SCS. Staff coordinated regular meetings of the Active Transportation Working Group to facilitate regional collaboration on the policies included in the 2016 RTP/SCS as well as share best practices on an on-going basis. Staff continued to enhance the Active Transportation Database to support local planning and enhance analysis of active transportation investments in Connect SoCal.

SCAG also began collaborating with the CTCs to prepare funding guidelines for the Cycle 5 of the Regional Active Transportation Program (ATP). SCAG represents the large MPOs on the statewide Active Transportation Program Technical Advisory Community and facilitates ongoing discussions with the county transportation commissions and other regional stakeholders to enhance the selection, delivery and evaluation of ATP projects. Staff attended State CTC workshops in order to comment on the program guidelines, and convey concerns of our member jurisdictions. Staff also provided input and technical assistance for local ATP grant applicants.

Staff continued work on the "Go Human" active transportation safety and encouragement campaign, a program funded by ATP, California Office of Traffic Safety, Mobile Source Reduction Committee grants, and local sponsorships. Go Human includes three main components: Advertising Campaign, Community Outreach/Demonstration Events, and development of Active Transportation Training Toolkits and facilitation of training workshops. Staff activities in FY 2019-20 focused on refining and re-running the media and advertising campaign and delivering Community Outreach/Demonstration Events, or Go Human events. The Go Human campaign increased local awareness and education on rules of the road and how to walk, bike and drive safely. This year, the campaign was also expanded to include e-scooter education. Go Human events advanced local planning across by educating residents on potential improvements and generating public support and feedback on local plans. The Go Human events also implement regional policies aimed at increasing safety and investment in active transportation by increasing education and awareness of the rules of the road and critical role of walking and biking in regional mobility.

Projects to be undertaken in FY 2020-21 include:

Regional Prospectus

- Ongoing implementation of the Go Human campaign focusing on providing resources to local agencies to promote roadway safety through advertising, community outreach, and safety demonstration projects.
- Complete work on the SCAG Active Transportation Disadvantaged Communities Planning Initiative with ATP grant funding to develop active transportation plans in six disadvantaged communities and create a model for efficient development of plans leveraging SCAG planning, analysis and outreach tools.
- Partner with local agencies to deliver active transportation planning and capacity building grants through the Sustainable Communities Program (SCP), and conduct a new Call for Applications for Cycle 5 ATP funding.
- Support for delivery of projects awarded funding through the California Active Transportation Program (ATP). Ongoing collaboration with the California Transportation Commission, Caltrans, and county transportation commissions to maximize program benefits in Southern California. Support for Cycle 5 applications and delivery of projects awarded funding through previous cycles of the California Active Transportation Program (ATP).
- Continue to enhance and promote the Active Transportation Database to expand availability of bicycle and pedestrian data to inform local and regional planning, for example enabling integration with automated bike counters, and enabling batch downloads of Bike/Ped counts.
- Develop strategies and explore new partnerships for promoting the implementation of safe routes to school strategies in Connect SoCal.
- Provide technical assistance to local agencies to increase their readiness and competitiveness for State Active Transportation Program and Cap & Trade funds.
- Enhance modeling tools to project impacts of active transportation investments on vehicle miles travelled.

H. Aviation and Airport Ground Access

As a metropolitan planning organization, SCAG is focused on the region's airports and aviation system primarily from the perspective of airport ground access and the surface

Regional Prospectus

transportation system. Although SCAG does not have regulatory or developmental authority over the airports, SCAG does maintain an updated list of airport ground access projects, and SCAG plays a critical consultative and collaborative role with the airports, Caltrans, the transportation agencies and commissions, and other transportation stakeholders. The focus of SCAG Aviation Program during FY 2018-19 and FY 2019-20: research, data collection, analyses, writing, public comment, review, and editing processes for the 2020-2045 RTP/SCS (Connect SoCal).

- Establishing and re-establishing relationships with the airports, transportation commissions and agencies, Caltrans, federal agencies, and other aviation and transportation stakeholders.
- Reconvening the Aviation Technical Advisory Committee (ATAC), including scheduling and programming for ATAC meetings.

As the 2020 RTP/SCS cycle begins to wind down, the SCAG Aviation Program is focused on the following initiatives for the coming FY 2020-21, including the following:

- The implementation of Connect SoCal
- Maintaining and building on the relationships with the airports, transportation commissions and agencies, Caltrans, federal agencies, and other aviation and transportation stakeholders.
- Continuing ATAC meetings, with meeting locations and hosts rotating throughout the SCAG region.
- Research, data collection, and analyses for the upcoming 2024 RTP/SCS, as well as other SCAG aviation, airport, and transportation related papers and reports.
- Exploring opportunities for research projects, initiatives, and partnerships related to airport ground access and aviation systems planning.

I. Transportation Safety

SCAG's Transportation Safety Program works to motivate reductions in traffic-related fatalities and serious injuries and to integrate safety into the regional transportation planning processes and support local actions to implement the regional plan. During FY 2019-20, SCAG held multiple safety workshops across the region, which approximately 170

Regional Prospectus

government agency staff attended, including city planners, law enforcement officers, and traffic engineers. The purpose of the workshops was to educate agencies about the region's traffic safety issues and provide resources to empower agencies to take action. Staff coordinated regular meetings of SCAG's Transportation Safety Working Group to facilitate regional collaboration on strategies and actions included in the long-range plan as well as to share best practices. Based on stakeholder feedback, SCAG developed Connect SoCal, which included a framework that will help member agencies interested in pursuing safety initiatives and strategies at the local level. SCAG served on California's Strategic Highway Safety Plan (SHSP) Steering Committee and Zero Traffic Fatalities Task Force. SCAG functioned as the co-lead for the SHSP's Bicycle Challenge Area Team. SCAG established the region's 2020 safety targets. SCAG worked with stakeholders (e.g., City of El Monte and Omnitrans) to initiate the development of safety plans that will help advance Connect SoCal strategies and actions.

In FY 2020-21, SCAG will continue to engage stakeholders via its Transportation Safety Working Group; serve on the SHSP Steering Committee; function as the co-lead for the SHSP Bicycle Challenge Area Team; work with local jurisdictions to implement safety planning projects; establish annual regional safety targets; and monitor the region's progress on meeting its safety goals and targets.

J. Public Health

SCAG's Public Health Program aims to provide leadership and strategic policy formulation for transportation and land use-related public health in the SCAG region. During FY 2019-20, SCAG staff coordinated regular meetings of the Public Health Working Group to facilitate regional collaboration on strategies and actions included in the long-range plan as well as to share best practices. Based on stakeholder feedback, SCAG developed Connect SoCal, which included a framework that will help member agencies interested in pursuing public health-related initiatives and strategies at the local level. SCAG also supported public health efforts throughout the region through a public health fellowship program (funding up to 15 fellows). SCAG continued to enhance the California Public Health Assessment Model (C-PHAM), which contributed to improved public health impact analysis in Connect SoCal and allowed for more local level analysis.

Regional Prospectus

In FY 2020-21, SCAG will continue to engage stakeholders via its Public Health Working Group; conduct more local level analysis of public health impacts using C-PHAM, and support public health-related initiatives throughout the region through the public health fellowship program.

K. Environmental Planning and Compliance

Compliance with federal Clean Air Act (CAA) is a complicated and challenging requirement for SCAG, requiring detailed data collection, complex computer modeling, extensive inter-agency coordination, as well as specialized technical analysis and report writing. Staff works closely with regional, State, and Federal partner agencies to resolve numerous challenging issues in meeting the CAA requirements, including transportation conformity for 26 nonattainment and maintenance areas within the SCAG region. In FY 2019-20, SCAG adopted and received FHWA/FTA approval of the conformity determinations for the 2016 RTP/SCS Amendment #3, 2019 FTIP, Connect SoCal and the 2019 FTIP Consistency Amendments. SCAG also adopted the conformity re-determination for the 2016 RTP/SCS and the 2019 FTIP under the new 2015 Ozone National Ambient Air Quality Standards (NAAQS). SCAG adopted the final 2021 FTIP Guidelines and staff prepared conformity analysis for Connect SoCal. In addition, SCAG submitted Final Connect SoCal Technical Methodology to ARB. Staff reviewed, approved, and uploaded to federal CMAQ tracking system annual CMAQ project obligation reports from six CTCs. Staff completed one formal TCM substitution and also processed on-going TCM timely implementation requests from CTCs. Staff held eleven (11) TCWG meetings to facilitate federally required interagency consultation on important issues related to both regional and project-level transportation conformity.

Pursuant to the SB 375, SCAG staff prepared and subsequently submitted to ARB the Final Technical Methodology to Estimate Greenhouse Gas Emissions for the 2020-2045 RTP SCS.

Staff continued to participate in the development of AQMPs and fulfilled SCAG's federal and state air quality planning responsibilities. In FY 2019-20, updated ozone transportation conformity budgets for the Coachella Valley, Imperial County, the South Coast, Ventura County, and the Western Mojave Desert nonattainment areas, as well as new PM₁₀ transportation conformity budgets for the Imperial County were approved by ARB and subsequently submitted to the U.S. EPA.

Regional Prospectus

Staff reviewed and evaluated the Transportation Corridor Agencies and Orange County Transportation Authority (OCTA) Average Vehicle Occupancy Program Monitoring Reports and issued certification letters. Staff reviewed and approved the reporting of the Congestion Management and Air Quality (CMAQ) funded projects; and uploaded the required project information into the Federal User Profile and Access Control System (UPACS) – CMAQ database. Staff facilitated interagency consultation for RTP, FTIP, and project-level transportation conformity through the federally required Transportation Conformity Working Group (TCWG).

Compliance with the California Environmental Quality Act (CEQA) provisions is also required of SCAG when it serves as the lead agency with the responsibility for preparation of the environmental documentation for the RTP/SCS and other projects. Staff actively participates in the development of environmental documentation, such as the Program Environmental Impact Report (PEIR) for the RTP/SCS (2016 and Connect SoCal), to ensure regulatory compliance with the CEQA provisions as well as other applicable federal and state laws. Staff works closely with local and regional agencies and stakeholders and conducts consultation and public outreach during the preparation of environmental documentation for the RTP/SCS.

In FY 2019-20, staff initiated work on the Connect SoCal Draft PEIR, which included: releasing Notice of Preparation (NOP); hosting scoping meetings, consultations with Tribal Nations; documenting the regulatory framework and conducting environmental analysis; and releasing the Draft PEIR for public review on December 9, 2019. Staff will continue work efforts to complete the Connect SoCal Draft PEIR for certification and adoption on April 2, 2020. In FY 2020-21, SCAG will develop a robust CEQA program that will assist local jurisdictions and stakeholders. Assistance include but are not limited to CEQA streamlining, regional mitigation strategies, and implementation workshops, among others. Staff has and will continue to seek input from SCAG's Policy Committees in support of the environmental document.

In FY 2020-21, SCAG will continue to oversee and/or provide support for required air quality planning, analyses, documentation and policy implementation, including adoption and federal approval of conformity determination for the 2021 FTIP and 2020 RTP/SCS amendments. Staff will also continue to collaborate with the ARB and air districts in the SCAG

Regional Prospectus

region in developing/finalizing any AQMPs/SIPs, including setting appropriate new emission budgets to meet federal conformity requirements. Staff will facilitate federally required interagency consultation via the TCWG, continue the process to ensure the timely implementation of TCMs, and track and participate in relevant air quality rulemaking and policy development. Staff will also continue to participate in numerous air quality related working groups and advisory committees.

In addition, SCAG is a clearinghouse for regionally significant projects and SCAG's Intergovernmental Review (IGR) Program is responsible for reviewing applications for federal grants and financial assistance programs, federally required state plans, federal development activities, and federal environmental documents pursuant to Presidential Executive 12372. SCAG's IGR Program is also responsible for reviewing regionally significant plans, projects and programs per CEQA and ensuring that these regionally significant projects are consistent with SCAG's adopted regional plans like the 2016 RTP/SCS and 2020 Connect SoCal. In FY 2019 – 2020, SCAG staff produced six bi-monthly Clearinghouse Reports for public review that includes a list of all CEQA and project related notices that were submitted to SCAG for review. SCAG also developed the IGR Mapping Tool in 2018 for public use so SCAG stakeholders can use it to track the progress of certain projects. Staff has continued to log in all projects submitted to SCAG's IGR Program for review in the IGR Mapping Tool.

In FY 2020-21, SCAG staff will continue to ensure responsibilities of the IGR Program be met by producing bi-monthly Clearinghouse Reports and maintaining the IGR Mapping Tool by logging in all project documents and notices submitted to SCAG for review.

Title VI of the Civil Rights Act of 1964 establishes that transportation agencies need to disclose to the general public the benefits and burdens of proposed projects on minority populations and California Government Code Section 11135 forbids state agencies to unlawfully deny access and benefits of projects to any person based on "race, national origin, ethnic group identification, religion, age, sex, sexual orientation, color or disability." Therefore, SCAG is required to conduct an environmental justice (EJ) analysis on regional plans, including Connect SoCal to determine whether implementation of the Plan will result in disproportionately adverse impacts on low-income and minority groups. In FY 2019 – 2020, SCAG staff conducted extensive outreach (primarily receiving valuable input from the

Regional Prospectus

Environmental Justice Working Group (EJWG) which was established in 2018) and produced the Connect SoCal Environmental Justice Technical Report. The EJ Technical Report was developed based on previous successful with the 2016 RTP/SCS EJ Appendix and input from EJ stakeholders at four EJWG meetings, various targeted outreach meetings with stakeholders, and 20 Connect SoCal Workshops throughout the SCAG region (which included an EJ specific poster for input). This EJ Technical Report includes analyses of potential impacts of the Plan on low-income and minority populations, examination of historical trends related to EJ throughout the region and an expanded EJ Toolbox with recommended practices and approaches EJ stakeholders and local jurisdictions can use to combat adverse EJ impacts.

In FY 2020-21, SCAG staff will continue to hold quarterly EJWG meetings to provide a platform for EJ stakeholders to discuss relevant issues and collectively come up with strategies and solutions. SCAG staff will also update the EJ Toolbox periodically in between the RTP cycles to ensure recommended practices and approaches are current and relevant so the toolbox is useful to EJ stakeholders and local jurisdictions. Lastly, SCAG staff will continue to work on establishing an ongoing Environmental Justice Program at SCAG through the means of the EJWG and developing resource tools, like the EJ Toolbox, to fulfill SCAG's goals of being a resource to our stakeholders.

L. Regional Growth Forecasting, Policy Analysis, and Data/GIS Support

Major forecasting and data/GIS projects undertaken in FY 2019-20 included:

- Continued building on state-of-the-art forecasting methodology and data/statistics support, such that regional growth estimates and forecasts are technically sound and meet the Best Practices of MPOs general forecasting practices. A specific component of the GIS Services Program was the undertaking of introductory, intermediate and advanced GIS software training workshops for participating local jurisdictions, as well as providing GIS services for additional cities. SCAG has also provided technical support to local jurisdictions looking to utilize new economic development and tax increment financing tools available through state legislation – specifically Enhanced Infrastructure Financing Districts (EIFDs), Community Revitalization and Investment Authorities (CRIAs), and other tax increment financing mechanisms recently adopted by the State of California. In previous years, SCAG established a screening criteria and interactive tool to evaluate the viability of any neighborhood in the SCAG region to establish an EIFD or CRIA. SCAG has also partnered with other entities to conduct numerous pilots examining the financial viability of establishing a tax increment financing district to support regionally significant projects, and Los Angeles County Metropolitan Transportation Authority (“Metro”) utilized SCAG’s criteria and tool to evaluate grant awardees for their recent round of Transit Oriented Development Planning Grants. This year, SCAG has initiated a number of new pilot projects to evaluate the viability of tax increment financing tools for local sustainable infrastructure projects and economic development, and successfully launched the fourth EIFD in the state with partners from the City of Placentia and County of Orange.

SCAG continued to implement established Enterprise GIS (EGIS) system to further integrate all aspects of regional innovative planning and data-driven decision-making process, to build advanced GIS applications and tools, as well as acquire, develop and process regional data as part of fulfilling our strategic goal of being a central source of data/information about the

Southern California, in addition to fulfilling socioeconomic data requests from member agencies, universities, other public agencies and the general public in support of their planning/information needs.

Also, in FY 2019-20, SCAG continued a program aimed at increasing the adoption of new technology and the accessibility of data and analytics to our partner agencies and the general public. The Future Communities Initiative (FCI) is a three-year program that provides guidance, support data coordination and standardization, expand partnerships, and provides resources to local jurisdictions throughout Southern California. This program is resulting in studies and strategies for local cities that outline the steps needed to become "smart communities", develop a process for identifying data sets that could benefit from regional standardization and create processes for coordinating data collection, explore opportunities for engagement with supportive initiatives and build partnerships that magnify impact, and pursue resources for planning and implementation of open data, big data, and new technology initiatives.

In FY 2020-21, major regional forecasting, policy analysis, and data/GIS initiatives will include:

- Initiate a collaborating process with elected officials and regional stakeholders in the field of economic and job creation to develop a regional economic growth strategy to address challenges in economy, housing, income distribution, labor force, and local governments finance.
- Continue to strive for university partnership by establishing a joint classroom with the USC Dornsife Spatial Sciences Institute (SSI); this classroom will help students to learn about SCAG's regional planning as well as their assistance on SCAG's projects.
- Continue to provide state-of-the-art forecasting methodology and data/statistics such that regional growth estimates and forecasts are technically sound, and set the standard for MPO growth forecasting practice, and are communicated to stakeholders in a manner that supports the development of the RTP/SCS and RHNA.
- Continue to lead developing the programs for the Annual Demographic Workshop and Economic Summit by engaging demographers, economists, and planners.

N. Performance Measures

SCAG continuously monitors the performance of the region through the collection and analysis of a wide range of socio-economic, transportation, demographic, and environmental data. Table 1 features the on-going regional performance indicators SCAG will be using to evaluate performance of the 2020 RTP/SCS (Connect SoCal) over time. Connect SoCal identifies a set of regional goals and performance objectives, along with a corresponding set of specific quantitative performance measures to be used to assess progress being made toward achieving those regional objectives. SCAG has been collaborating with FHWA and Caltrans on the implementation of a regional performance-based planning and reporting program as mandated by MAP-21 and the FAST Act. SCAG will continue to coordinate with FHWA and actively participate in statewide technical work groups, workshops, and other inter-agency performance monitoring information exchange opportunities, as part of the MAP-21 national performance-based planning and reporting program.

To ensure the Federal Transportation Improvement Program (FTIP) is on-target and consistent with RTP objectives and budgets, SCAG monitors FTIP implementation through:

- An enhanced FTIP database;
- Regional transportation monitoring programs, including the Highway Performance Monitoring System (HPMS) and a Regional Transportation Monitoring Information System (RTMIS); and

Regional Prospectus

- Periodic administrative or FTIP technical amendments reflecting transportation policy or budget changes, shifting conditions, or transportation project additions or deletions.

Additional projects to be undertaken in FY 2020-21 include:

- Coordination with all 197 local jurisdictions (cities and counties) in the SCAG region to facilitate collection of data for the Highway Performance Monitoring System (HPMS).
- Data collection and analysis in support of various Regional Performance Assessment activities, including the annual Average Vehicle Occupancy (AVO) analysis and reporting for two Orange County toll facilities.

IV. Implementation of the RTP/SCS and FTIP

In FY 2018-19, SCAG adopted Amendment # 3 to the 2016 RTP/SCS, which was certified by FHWA/FTA in December 2018, to allow for critical transportation improvement projects throughout the region to move forward in a timely manner.

The focus of FY 2020-21 will be to work with regional partners to implement Connect SoCal. SCAG has ensured that Connect SoCal is consistent with state and federal requirements while addressing the region’s transportation needs.

Regional Prospectus

The Federal Transportation Improvement Program (FTIP) is a multimodal list of capital improvement projects programmed over a six-year period. The FTIP is the program that implements the RTP. The 2019 FTIP was federally approved and found to conform on December 17, 2018, and includes approximately \$34.6 billion for transportation projects proposed over fiscal years 2018-19 – 2023-24. The FTIP must include all federally funded transportation projects in the region, as well as all regionally significant transportation projects and projects programs for which approval from a federal agency is required regardless of funding source. The FTIP is developed to incrementally implement the programs and projects in the RTP/SCS in accordance with federal and state requirements. The FTIP is amended on an on-going basis, as necessary, thereby allowing projects consistent with the RTP to move forward toward implementation.

During FY 2019-20, SCAG successfully secured approval of the 2019 FTIP by the Regional Council and subsequent positive conformity determination by FHWA/FTA in December of 2018. In addition, SCAG also continued amendments and modifications (admin) to the 2019 FTIP so that the transportation improvement projects around the region could move forward without disruption. SCAG has always maintained a close partnership with the federal and state funding agencies as well as its regional partners in processing FTIP Amendments and Administrative Modifications in the most efficient manner possible. SCAG also initiated the development of the 2021 FTIP Guidelines to assist our partner agencies in the development of the county TIPs and overall 2021 FTIP.

V. MAP-21 Implementation: Performance-based Planning and Programming

MAP-21 requires the establishment, monitoring, and management of regional performance targets and measures relating to Transportation Safety, Pavement and Bridge Condition, National Highway System Performance, Freight Movement on the Interstate System, and performance of the regional Congestion Mitigation and Air Quality Improvement (CMAQ) program. In compliance with these federal requirements, SCAG has coordinated with Caltrans and local stakeholders to establish regional targets in these respective areas and a path towards achieving and monitoring them. More specifically, SCAG worked with state and local stakeholders on the establishment two- and four-year regional performance targets

Regional Prospectus

within each of these federally-designated performance areas. SCAG also collaborates annually with Caltrans to set regional Transportation Safety performance targets for each calendar year.

SCAG will provide periodic updates to regional stakeholders on progress being made toward achieving the regional MAP-21 performance targets, including in Connect SoCal and in updates to the FTIP. Furthermore, SCAG will continue to allocate appropriate resources toward this monitoring effort, and will account for activities associated with fulfillment of these federal performance management and reporting requirements.

VI. Overview of Public Participation and Consultation

A. Public Participation Plan

Input and engagement from the across the region is critical in planning for such a large and diverse region. SCAG relies on public participation as the essential element to the ground-up and integrated approach to SCAG's planning. SCAG adopted a Public Participation Plan in September 2018 that details goals, objectives and state/federal requirements for providing the public and stakeholders with opportunities to understand, follow, and actively participate in the regional planning process.

Consistent with state and federal regulations, SCAG provides for formal comment periods for the RTP/SCS, FTIP, as well as other major plans, projects and programs. The agency also engages in regular activities that provide on-going opportunities for public input at public meetings, hearings and workshops, an always-available 'contact us' link and form on the agency website and 'contact us' form (print or online) in the adopted Public Participation Plan. SCAG reviews, addresses and incorporates as appropriate, all comments received. In addition, the Public Participation Plan includes language to assist transit operators who are relying on SCAG's FTIP public participation process to satisfy the public participation requirements for their Program of Projects, under 49 U.S.C. Section 5307.

SCAG is also required to demonstrate its compliance with the Department of Transportation's Title VI requirements every three years. An update to SCAG's Title VI Program which includes the agency's Language Assistance Program for Limited English

Regional Prospectus

Proficient populations, was adopted by the Regional Council in September 2017, and subsequently approved by the Federal Transit Administration. With the development of its Language Assistance Program, SCAG is working toward improving its strategies to engage and seek input from traditionally underserved populations by providing translations of key materials into Spanish, Chinese, Korean and Vietnamese, the four most spoken languages in the region's households other than English. The Language Assistance Program also provides for interpreters in these languages at workshops and other public meetings, with 48 hours notification.

As part of SCAG's outreach, SCAG has been implementing a comprehensive public information and communications program to inform stakeholders, partners and the general public about agency programs, plans, services and initiatives using websites, social media, video production, publications, e-newsletters, op-eds, fact sheets, media advisories and news releases.

- Alerts via email, social media, electronic newsletters and in-person presentations to local governments, community organizations, academic groups, business organizations, environmental groups, Tribal Governments, under-represented groups and traditionally underserved groups.
- Increased opportunities for public engagement through video and web conferencing.
- Updating SCAG's websites to provide the latest news, notices of public comment period dates/times, and opportunities to provide comment.

B. Connect SoCal Public Engagement

In FY 2019-20, SCAG began executing public engagement and outreach for Connect SoCal, which included:

- Ongoing work with cities and counties on development of base data and future growth scenarios.
- Partnerships with local non-profits in developing a vision for sustainable growth and trade-offs.

Regional Prospectus

- Street teams attending public events to increase awareness of Connect SoCal.
- Monthly Stakeholder Working Groups to seek input on specific study areas within the Plan, such as open space, public health, active transportation, mobility innovations and environmental justice.
- Presentations to local Councils of Governments, cities and other technical advisory committees on the development of Connect SoCal.
- Workshops, open houses, and meetings throughout the region.
- Policy discussions at the board and committee levels.

In spring 2019, SCAG began its outreach efforts by developing an advertising strategy, facilitating and coordinating outreach forums during the early development phase of the Plan, and increasing participation from a wide variety of stakeholders. SCAG held over 20 workshops throughout the region for the general public and interested parties to evaluate and provide input on several future development scenarios. SCAG is required by state law to hold public workshops in each county throughout the region to provide the public with the information and tools necessary to understand the issues and policy choices available through Connect SoCal. SCAG advertised the availability of the workshops in advance and worked with community partners (including Community Based Organizations (CBOs), cities, counties or other local influencers) to spread the word about the events. SCAG collected input at the workshops and through online surveys.

In FY 2019-20, SCAG has continued to engage the public during the draft plan stage. In late summer 2019, SCAG produced a report summarizing the outreach activities and feedback received to that point and outlining how that input would be used in the final plan. In November 2019, a Draft Connect SoCal Plan was released to the public for review and comment. During the 10-week comment period SCAG held three public hearings, a webinar and a tele-town hall, as well a series of 21 briefings for local elected officials and the public throughout the region. Outreach also included advertising the availability of the Draft Plan and continuing the monthly Stakeholder Working Group meetings. As a result of the Community Partner Program through CBOs, SCAG developed a Public Engagement Guide. In FY 2020-21, SCAG will implement several of these recommendations to further engage the general public and further community participation in meaningful ways.

Regional Prospectus

C. SCAG Regional Offices

In addition to its main headquarters in Los Angeles, SCAG operates a Regional Office in five (5) other counties in Southern California and has videoconferencing sites at three (3) additional locations throughout the region. Videoconferencing further enhances the agency's outreach efforts as well as accessibility to the public. Through these Regional Offices and videoconferencing sites, SCAG is able to engage an extensive group of stakeholders in its planning and programming processes by facilitating meetings, workshops, and other events and enhances the level of convenience for members, stakeholders and others interested in learning more about regional planning. SCAG will continue to advance its public participation and consultation efforts through the use of its Regional Offices.

D. Native American Tribal Governments Consultation

There are 16 federally recognized Native American Tribal Governments in the SCAG region. SCAG's Bylaws provide Tribal Governments a formal voice in the regional planning process, including voting representation on the Regional Council and policy committees. In response to state and federal consultation requirements, as well as public participation needs and environmental justice concerns, SCAG is continuing to develop processes to ensure that Tribal Governments' concerns are reflected in the regional transportation planning and programming processes, including developing documented procedures for consultation with Indian Tribal Governments and Federal Land Management Agencies.

In FY 2019-20, SCAG initiated Tribal Consultation pursuant to AB 52 to support the development of the Connect SoCal PEIR. SCAG will continue engagement to consult with Tribal Governments in FY 2020-21 to exchange information, have consultation meetings, provide updates and obtain input on the implementation of Connect SoCal and develop potential mitigation measures with regards to Tribal Cultural Resources for future planning cycles.

Regional Prospectus

SCAG Organizational Structure and Decision Making Steps

General Assembly (GA) – SCAG is governed by official representatives from every member city, county and CTC through the GA which annually brings together SCAG’s membership and helps set the course for the coming year. The GA is a forum where policy matters can be identified and addressed. The GA also adopts the General Fund budget for the next fiscal year, ratifies SCAG officer positions, and considers approval of any proposed changes to the SCAG Bylaws as well as any proposed resolutions for adoption by the GA.

Regional Council (RC) – The primary decision-making occurs through SCAG’s RC, a governing body comprised of elected officials representing six (6) counties and 191 cities in the SCAG region. The SCAG Bylaws provide for RC representation from each of the CTCs, the recognized tribal governments, air quality agencies and the Transportation Corridor Agencies. In September 2014, the RC also approved the addition of a public transportation representative to serve on the body to represent the transit interests of all the operators in the SCAG region. SCAG’s policy-making process is guided by the work of SCAG’s three major Policy Committees: the Transportation Committee; the Community, Economic and Human Development Committee; and the Energy and Environment Committee. Members of the RC serve on one of the three Policy Committees for two-year terms.

The following summarizes the roles of the Policy Committees as well as other committees with SCAG:

Transportation Committee (TC) – The TC examines regional policies, programs and other matters pertaining to mobility and accessibility, roads and highways, transit, airports and seaports, system preservation and management, goods movement, transportation finance and other aspects of Southern California’s transportation system.

Community, Economic and Human Development Committee (CEHD) – The CEHD oversees the agency’s efforts to develop regional policies for housing, economic development, land use, growth forecasting, sustainability and other community development needs.

Regional Prospectus

Energy and Environment Committee (EEC) – The EEC considers environmental and energy-related issues of regional significance, including air and water quality, solid and hazardous waste, habitat preservation, environmental justice, greenhouse gas reduction and matters pertaining to the California Environmental Quality Act.

Legislative, Communications and Membership Committee (LCMC) – The LCMC is responsible for developing recommendations to the Regional Council regarding legislative, communications and membership matters; providing policy direction for the agency's marketing communications strategy, outreach issues/materials and electronic communications systems; reviewing sponsorship opportunities for the agency whose cost will exceed \$5,000; and promoting agency membership. The duties of the LCMC may also include such other duties as the RC may delegate.

Executive/Administration Committee (EAC) – SCAG's core leadership team is represented by the EAC, which includes the RC Officers (President, First Vice President, Second Vice President and Immediate Past President) and Policy Committee Chairs and Vice Chairs. In addition to their critical position in guiding SCAG's regional decision-making process, EAC members play an elevated role as SCAG representatives throughout the region as well as at the state and federal levels. The EAC also addresses matters regarding human resources, budgets, finance, operations, communications and any other matters referred by the RC. PROGRAM: 010 - SYSTEM PLANNING

MANAGER: NARESH AMATYA

TOTAL BUDGET: \$1,742,976

OBJECTIVE

Transportation System Planning involves long-term planning for system preservation, system maintenance, optimization of system utilization, system safety, and strategic system expansion of all modes of transportation for people and goods in the six-county region, including Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura. The RTP/SCS is the primary vehicle SCAG uses to achieve our transportation system planning goals and objectives. As the MPO for this region, one of SCAG's major responsibilities is to develop, administer, and update the RTP/SCS. The primary objective of this work element is to ensure SCAG is fulfilling its roles and responsibilities in this area as the designated MPO and RTPA for this region. The focus of FY 2020-21 will be to develop a framework and work with our partners towards implementation of the adopted 2020 RTP/SCS (Connect SoCal). SCAG will ensure that Connect SoCal is consistent with state and federal requirements while addressing the region's transportation needs.

PREVIOUS ACCOMPLISHMENTS

In FY2019-20, SCAG completed the TDM Strategic Plan, including updating the TDM toolbox, for inclusion in Connect SoCal. SCAG also initiated procurement activities to advance key recommendations in the TDM Strategic Plan, including TDM training and development of regional performance metrics and a regional TDM data clearinghouse.

OBJECTIVES

Transportation Demand Management (TDM) is a key strategy for helping the region achieve its mobility, air quality, and sustainability goals. The objective of this task is to develop and promote transportation options to improve mobility in the region by identifying and evaluating strategies that promote alternatives to the single-occupant vehicle (SOV). The TDM Toolbox is a cafeteria of TDM strategies, such as carpooling, vanpooling, parking cash-out, etc., designed to reduce overall vehicle-miles of travel (VMT). The TDM Toolbox can be found in the Connect SoCal 2020 RTP/SCS Congestion Management Appendix.

PROGRAM: 030 - FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM (FTIP)

MANAGER: NARESH AMATYA **TOTAL BUDGET:** \$2,086,580

OBJECTIVE

The Federal Transportation Improvement Program (FTIP) is a multimodal list of capital improvement projects programmed over a six-year period. The FTIP is the program that implements the RTP. The currently approved FTIP is the 2019 FTIP and was federally approved and found to conform on December 17, 2019. The program contains approximately \$34.6 billion worth of projects beginning FY 2018-19 to FY 2023-24. The FTIP must include all federally funded transportation projects in the region, as well as all regionally significant transportation projects and projects for which approval from a federal agency is required regardless of funding source. The FTIP is developed to incrementally implement the programs and projects in the RTP/SCS in accordance with federal and state requirements. The FTIP is amended on an on-going basis, as necessary, thereby allowing projects consistent with the RTP/SCS to move forward toward implementation. While the 2019 FTIP continues to be amended, SCAG has begun the development of the 2021 FTIP which will be approved by our federal partners in December 2020. SCAG will also continue work to enhance the functionality of programming and performance monitoring databases that support the program.

PROGRAM: 050 - ACTIVE TRANSPORTATION PLANNING

MANAGER: FRANK WEN **TOTAL BUDGET:** \$1,191,491

OBJECTIVE

Staff will continue to research and explore opportunities and partnerships to implement the core regional active transportation strategies. In addition, staff will develop partnerships and strategies that are coordinated with the rapid deployment of micro-mobility services to advance complete streets goals and reduce the use of SOVs for short trips. Staff will also work with Caltrans, counties and individual cities to fund local active transportation plans and multi-jurisdictional active transportation projects that are part of Connect SoCal, the 2020 RTP/SCS. Staff will begin engaging with Community Based Organizations in laying a strong foundation for development of the 2024 RTP/SCS.

Staff will also continue to manage the Regional Active Transportation Program, including providing technical assistance to project sponsors, managing planning and program grants, tracking project delivery, and preparing program amendments, as necessary. Staff will provide leadership and input at the state and regional level to ensure future funding cycles align with regional planning goals. Through continued collaboration with the California Transportation Commission, Caltrans and the Southern California Regional Transportation Planning Agencies, SCAG will also work to improve the application and allocation procedures.

Efforts will also be continued to expand regional capability to measure the impact of active transportation investments, including through better data collection, modeling and co-benefit analysis (focusing on greenhouse gas emissions, public health and the economy).

OBJECTIVES

Provide Local Technical Assistance and the Toolbox Training Series to build local capacity in innovative and integrated transportation and planning tools. The Toolbox Tuesdays serve as important opportunities for inter-governmental communication. In a region as vast as SCAG, forums where staff from dense urban communities can share their concerns and successes with planners from less populated areas are highly valued. Toolbox Training sessions equip local government planners to think beyond their traditional roles, and respond to new mandates that require collaboration and public participation.

Staff participated with SANDAG, MTC, and the County of San Francisco on a statewide TNC data collection effort funded by a Caltrans grant. Staff worked with the other grant partners to continue to manage the general project tasks. Staff worked with the consultant to prepare the survey instrument and prepare it for distribution in the SCAG region. The survey instrument was deployed using an app based system called RMoves. SCAG stakeholders including LA Metro and OCTA were briefed on the project and provided the raw results.

OBJECTIVES

This project will conduct a survey of Transportation Network Company (TNC) users, non-users and drivers in the San Francisco Bay Area region, the Los Angeles region, and the San Diego region as part of the Future Mobility Research Program (FMRP). This cooperative effort aims to define a consistent approach for evaluating the range of potential changes to travel behavior associated with TNC services and future autonomous TNC services. Data collected through this project will enable MPOs and planning agencies to effectively model travel behavior and explore policies to guide these emerging modes in our respective long-range transportation plans.

SCAG Activity based model development for 2020 RTP/SCS was fully completed. Key improvements include: additional sub-models, calibration of key sub-models, system-wide model validation, comprehensive testing, software enhancement, and improving model running speed. The peer review meeting was conducted and the SCAG ABM meets federal and state laws/requirements. The model outputs were analyzed and used for the 2020 RTP/SCS.

OBJECTIVES

The objective of this project is to continue the model enhancement based on feedback from peer review and internal analyses/evaluation. The major tasks includes (i) updating model inputs and parameters, and (ii) model components enhancement. The model components, parameters and outputs will be analyzed to identify the key sub-models that needs re-estimation and re-calibration. The model enhancement will focus on:

- Incorporate new sub-models trip departure time of day (MDCEV) and in-home/out- of home activity generation
- To improve model sensitivities by adding new components- pricing, parking and land use

PROJECT: SB 743 VMT MITIGATION ASSISTANCE PROGRAM

DEPARTMENT NAME: 428 - COMPLIANCE & PERFORMANCE MONITORING DEPT.
MANAGER: RONGSHENG LUO **TOTAL BUDGET:** \$579,071

PROJECT DESCRIPTION

Provide resources to local jurisdictions in the SCAG region for implementing new CEQA transportation impact assessment regulations as mandated by SB743. SB 743 replaces motor vehicle delay with VMT as a the appropriate metric for assessing CEQA transportation impact. Local agencies in the SCAG region have expressed concern regarding the provision of adequate resources to implement this new regulation at the local level, particularly for VMT mitigation. This cooperative effort with the City of Los Angeles focuses on the evaluation of opportunities for developing a regional VMT exchange or banking program as potential VMT mitigation options to benefit local agencies throughout the SCAG region.

OBJECTIVES

Provide resources to local jurisdictions in the SCAG region for implementing new CEQA transportation impact assessment regulations as mandated by SB743. SB 743 replaces motor vehicle delay with VMT as a the appropriate metric for assessing CEQA transportation impact. Local agencies in the SCAG region have expressed concern regarding the provision of adequate resources to implement this new regulation at the local level, particularly for VMT mitigation. This cooperative effort with the City of Los Angeles focuses on the evaluation of opportunities for developing a regional VMT exchange or banking program as potential VMT mitigation options to benefit local agencies throughout the SCAG region.

Specific outreach completed includes the formation of Advisory Committees made up of city/agency staff and community stakeholders; holding of public workshops; the development of project webpages; conducting of stakeholder interviews/focus groups; and holding of pop-up community/demonstration events. PROGRAM: 280 - FUTURE COMMUNITIES INITIATIVE

MANAGER: HSI-HWA HU **TOTAL BUDGET: \$10,505,601**

OBJECTIVE

The Future Communities Initiative, guided by the Emerging Technologies Committee, includes early action items aimed at harnessing the power of new technologies, big data, open data as well as enhanced analytics to promote innovation in regional and local planning and reduce transportation demand. Tools and resources provided through the initiative will enable more informed regional and local policy making, increase the efficiency of public service delivery, and ensure the financial sustainability of future cities. The Future Communities Initiative will play a key role in reducing VMT and GHG emissions by modernizing regional land-use and transportation planning tools, fostering data-driven collaboration with SCAG’s partner agencies, and providing local agencies with planning resources to pilot new technologies and initiatives to reduce travel demand.

PROJECT: FUTURE COMMUNITIES PARTNERSHIP GRANT PROGRAM

DEPARTMENT NAME: 417 - MOBILITY PLANNING AND MANAGEMENT
MANAGER: PHILIP LAW **TOTAL BUDGET: \$3,741,377**

PROJECT DESCRIPTION

The Future Communities Partnership Grant Program is a collaboration between SCAG and the Mobile Source Air Pollution Reduction Review Committee (MSRC) to support city and county agencies in implementing innovative pilot projects that reduce vehicle miles traveled (VMT) from local travel and municipal operations through new technologies and enhanced data analytics. In Phase 1, SCAG will conduct research and analysis to identify new and innovative pilot concepts for reducing VMT, as well as identify more traditional Transportation Demand Management (TDM) strategies that may yield a greater return on investment. The findings from the research will be used to develop program guidelines for a call for projects, which will be issued in FY 2018/2019. In Phase 2, up to \$2 million in MSRC funds will be awarded to implement pilots.

PREVIOUS ACCOMPLISHMENTS

This is a new task in FY21.

OBJECTIVES

The foundation for a regional clearinghouse of public sector demographic, land-use, transportation, and public opinion data will be established. This will support regional and local planning for implementation of the SCS by (1) enhancing SCAG's existing data system capability to meet local needs for data-driven decision-making, government transparency, collaborative regional and community planning; (2) expanding SCAG's data infrastructure system, enhancing regional data standardization, performing best practices for improvements on data updates; and (3) improving system management, maintenance, and security in order to fully implement and facilitate the region's needs of open data, big data, and new technology utilization for data sharing and data visualization in innovative planning. This will result in an integrated data platform that supports the update of local general plans— including interactive dashboards that help local jurisdictions make decisions according to sustainability metrics included in SCAG's SCS.

This task primarily focuses on the cloud infrastructure development component of the RDP project . The cloud infrastructure will help provide to the local jurisdictions the essential and new data elements and tools, which can help them produce plans and studies. The cloud infrastructure outputs may include but not limited to the followings: hosted services during the development of the Regional Data Platform, ensuring the availability and reliability of the

PREVIOUS ACCOMPLISHMENTS

SCAG finalized strategies for Connect SoCal, the 2020 RTP/SCS. This effort included additional engagement with local jurisdictions and incorporating feedback received through the draft plan public comment period. The proposed final plan was posted to the external public website on March 27, 2020, and was adopted by Regional Council for federal conformity purposes only on May 7, 2020. Regional Council also directed staff to further work with stakeholders to understand the impacts of COVID-19 on Connect SoCal, as well as work with local jurisdictions to restore entitlements. SCAG began that work in May in consultation with the Technical Working Group, and reported to Regional Council on progress at the beginning of July. SCAG will work towards the full adoption of Connect SoCal for state and federal purposes in September.

SCAG continues to correspond with ARB in advance of the final technical methodology submittal. This additional work will help to document and communicate the technical and modeling components of the strategies developed for Connect SoCal.

OBJECTIVES

This task will develop innovative strategies to meet updated SB375 GHG reduction targets for the 2020 RTP/SCS, Connect SoCal. The work under this task will address needs expressed by ARB and seek to meet goals of the updated CA Scoping Plan for 2030 and 2050 GHG reduction targets.

PROJECT: HQTA/SUSTAINABLE COMMUNITIES INITIATIVE

DEPARTMENT NAME: 426 - SUSTAINABILITY DEPT.

MANAGER: JASON GREENSPAN **TOTAL BUDGET: \$270,132**

PROGRAM: 290 - RESEARCH, PLANNING AND ENGAGEMENT FOR SUSTAINABLE COMMUNITIES

PROJECT DESCRIPTION

The SCAG region, home to about 18.3 million people in 2012, currently features 5.9 million households and 7.4 million jobs. By 2040, the 2016 RTP/SCS projects that these figures will increase by 3.8 million people, with nearly 1.5 million more homes and 2.4 million more jobs. The 2016 RTP/SCS projects and anticipates an overall land use pattern that reinforces the trend of focusing new housing and employment in the region's High Quality Transit Areas (HQTAs). Consensus will need to be reached to ensure these patterns can be achieved, will reinforce VMT and GHG reductions, and will support transit oriented development. A pilot project approach will be developed to identify and analyze issues that relate to integration of regional transportation and community goals and objectives in land use to better determine context-sensitive approaches for supporting growth in HQTAs in a variety of regional settings .

High-Quality Transit Areas (HQTAs) are generally walkable transit villages or corridors, consistent with the 2016 RTP/SCS and are within one half-mile of a well-served transit stop or a transit corridor with 15-minute or less service frequency during peak commute hours.

An HQTA is based on the language in SB 375 which defines:

- Major Transit Stop - A site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods (CA Public Resource Code Section 21064.3).
- HQTC High-Quality Transit Corridor – A corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.
